The Top 250 International Contractors

Seeking Greener Pastures

Large international contractors, particularly from Europe, are seeking new markets in Asia and the Americas *By Peter Reina and Gary J. Tulacz*

Int'l Market Analysis

Comparing the Past

Decade's International Contractor Revenue

Large international contractors are scrambling for work amid stagnant markets in Europe and the U.S., while other fertile markets in the developing world, such as North Africa, are mired in political upheaval. However, contractors are finding opportunities in other regions, and most are holding their own even in depressed markets. But it means more contractors are testing new waters in the international marketplace.

The growing number of contractors finding success in new global spots helps explain why ENR has decided to expand its list of top international contractors. Now, the list includes 250 top firms, up from 225, in recognition of the growing number of contractors flourishing in the international marketplace. (The ENR Top International Contractors list had been a Top 250 list until 1991, but it was cut back to a top 225 list in 1992.)

On the Top 250 International Contractors list, firms are ranked based on contracting revenue from projects outside of their home countries, measuring their presence in international commerce. ENR also has expanded its Top 250 Global Contractors list, which ranks contractors based on total worldwide contracting revenue, regardless of the projects' locations.

The ENR Top 250 International Contractors had \$511.05 billion in contracting revenue in 2012 from projects outside their home countries, along with \$813.55 billion in revenue from domestic projects, for

"The entire ASEAN zone is a growth area for our companies, in particular Vietnam, Indonesia, Burma and Malaysia."

Jean Rossi,
President, Vinci
Construction
S.A.

a total contracting revenue of \$1.32 trillion.

For year-to-year comparisons, the only revenue considered was from this year's 225 largest international contractors. This year's top 225 had international revenue of \$507.50 billion in 2012, which represents a 12.0% increase over the \$453.02 billion from last year's Top 225.

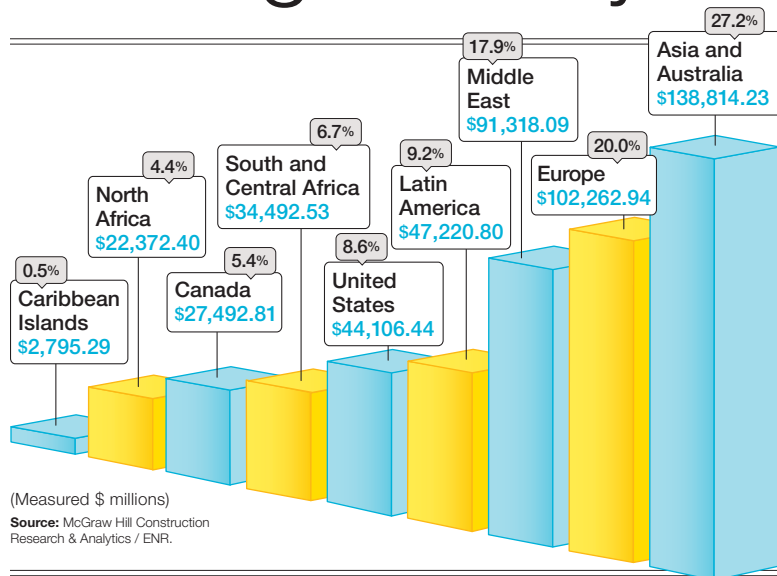

On a regional basis, Canadian projects are the big winner, with a 33.6% increase among this year's Top 225 list. International contracting revenue also was up 23.0% in Asia and Australia, 22.0% in Latin America, 20.0% in the U.S. and 9.0% in the Middle East.

Not surprisingly, contracting revenue for the Top 225 contractors was relatively flat in financially strapped Europe, rising only 0.3%. And while contracting revenue rose 2.5% in central and southern Africa, it fell 10.5% in strife-torn northern Africa.

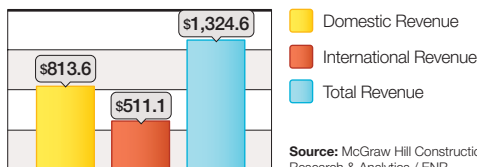

'New World' Opportunities

With European markets working through a prolonged stagnation, many large European contractors are recasting their strategies. U.K.-based Balfour Beatty plc, for example, is combining the design and management skills of its U.S.-based Parsons Brinckerhoff subsidiary with the capabilities of its existing investment, construction and operations units to offer full life-cycle services, says CEO Andrew McNaughton.

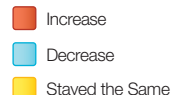

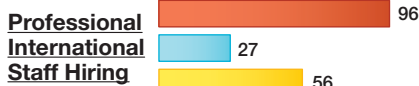

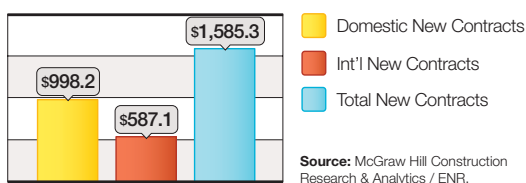

Int'l Region Analysis

Revenue (in \$ billions)

New Contracts (in \$ billions)

(Measured in firms reporting)
Source: McGraw Hill Construction Research & Analytics/ENR.

As part of that strategy, Balfour Beatty is selling its rail engineering business in European countries where it has no other businesses. "You have to be in more than one sector," explains McNaughton.

France's Bouygues Construction SA also is developing "skills and businesses over the longest possible value chain" to boost local and international business, says chairman and CEO Yves Gabriel. He attributes his firm's win of a share in a \$515-million real estate development contract in Miami to its strategy of "positioning ourselves on complex, high-value-added projects." Bouygues used its presence on a public-private partnership (PPP) for the Miami Port tunnel project to gain entry to the U.S. market, which is attracting increasing numbers of European-based firms.

The U.S. "is probably going to become our target construction market at the end of the year" as construction demand picks up in regional markets, says McNaughton. As a "stable, resource-driven market," Canada remains a key focus for Balfour Beatty, he adds.

"In all likelihood ... many major projects will be launched in the United States," says Jean Rossi, president of Paris-based Vinci Construction SA. Vinci is working on the road, bridge and tunnel Ohio East End Crossing PPP projects between Kentucky and Indiana.

Italy's Maire Tecnimont is particularly interested in the shale oil and gas developments under way in the

U.S. "Additional gas supply volumes at lower prices are making the North American gas market really appealing for large downstream investments in each of our business units: oil and gas, petrochemicals and fertilizers," says Chairman Fabrizio Di Amato.

The U.S. market "has definitely gone up," attracting increasing competition from European firms, says Johan Karlström, CEO of Sweden-based Skanska. The European presence in the U.S. has grown substantially through local acquisitions, he adds.

European Blues

Europeans' interest in the U.S. stems partly from the more difficult conditions on their side of the Atlantic. "Investment capacity in Eastern Europe is suffering from a reduction in European Union funding and stricter national budget constraints," notes Gabriel. But demands for infrastructure "offer good prospects in the medium term."

In Eastern Europe, Bechtel Inc. is targeting major highways following successful large contracts in countries, including Albania and Kosovo, says Peter Dawson, president of London-based Bechtel Civil Infrastructure. But "the opportunities are scarcer than they once were," he adds.

Bechtel's Eastern European experience is not all good. Because of limited government budgets, Bechtel

spending "a lot of money on infrastructure," he says, but competition from other Europeans is intensifying.

European firms also are finding renewed activity in the Middle East and North Africa (MENA). "We are seeing growth coming back," and even Dubai "is growing again," says McNaughton. Dawson sees many regional opportunities, particularly in rail and metros, but the market is highly competitive, he says. A Bechtel consortium last month clinched a \$10-billion turnkey contract for two lines of Riyadh's new metro system.

Vinci's primary Middle Eastern market is Qatar, where the firm has a share in a \$2-billion metro contract. Vinci controls 49% of the joint venture with the sovereign wealth fund Qatari Diar, which leads the metro consortium. Fuelled by preparations for the 2022 World Cup, Qatar "remains very dynamic," adds Gabriel. "But we face strong competition."

Not all is promising in the Middle East, thanks in part to the European banking crisis. MENA is "the major market for [engineer-procure-construct] con-

tractors these days,” says Kim, Yeon Joon, a manager on the international business planning team for Korea’s Hyundai Engineering & Construction Co. However, he says project financing from European banks and other financial institutions has become more difficult, halting plans for many major projects in the MENA region.

The global financial crisis in 2008 hit the Middle East hard, and its effects are still being felt. “Governments delayed projects, and banks halted providing financial support to the contractors,” says Yousef Maswadeh, director of business development for Kuwait’s Kharafi National. He says banks and financial institutions are lending again, but “the qualifications for obtaining financial aid have become more stringent” and, in many cases, the costs of borrowing have skyrocketed.

Further, many MENA-region contractors are feeling more competition from European contractors. “European construction firms [are showing] greater interest in Turkey every passing day,” says Mehmet Okay, board member of Turkey’s ANT Yapi.

However, Okay says his firm is feeling less pressure in Russia and the Commonwealth of Independent States. For example, ANT Yapi is building the 85-floor OKO City tower in the Moscow International City Center. The firm also is building 1.3 million sq ft of hotel and apartment space in the run-up to Russia’s 2014 Sochi Winter Olympics.

Political unrest in North Africa has caused a pause in many major projects. Maswadeh says Kharafi National managed to avoid the turmoil except in Egypt. “The current political situation in Egypt might delay implementation of mega-infrastructure development projects” that rely on build-operate-transfer and PPP financing programs, he says.

Libya is another area of concern, but some contractors believe stability is beginning to return to the market. “Our operations did see a setback with upheaval in Libya, where we had both oil-and-gas and infrastructure projects. We are, however, happy to note that the situation is improving in the country, and we have started mobilizing manpower to resume projects,” says Atul Punj, chairman of India’s Punj Lloyd Group. He says that Punj Lloyd prefers to be the lead contractor on projects when risk is an issue.

East Asia remains a construction powerhouse. “The entire ASEAN [Association of Southeast Asian Nations] zone is a growth area for our companies, in particular Vietnam, Indonesia, Burma and Malaysia,” notes Vinci’s Rossi.

Bechtel focuses on natural-resource sectors in the region as transportation and infrastructure are “less of

Oil & Gas

Italy's Maire Tecnimont (**No. 52**) and Japan's JGC Corp. (**No. 32**) are completing work on the \$4.7-billion integrated gas development Project Habshan 5 in Abu Dhabi. The five-year job employed up to 30,000 workers from 35 different countries. In June, "the project achieved a milestone of accumulating 100 million safe man hours without a Lost Time Incident," says Maire Tecnimont Chairman Fabrizio Di Amato.

a priority," he adds. "The number of opportunities in China has dropped" partly because of the growth of "local competence," he says.

For Bechtel, India is a global engineering and procurement base as well as a local market, particularly in refineries and petrochemical. But "margins are very thin," says Dawson. The BRIC countries—Brazil, Russia, India and China—are, in general, "very tough" for contractors, he adds.

"India and China will continue to be the most important construction markets, driven primarily by the irreversible forces of urbanization and infrastructure growth," says S.N. Subrahmanyam, senior executive vice president of India's Larsen & Toubro Ltd. India and China, as well as the Middle East, "are expected to grow rapidly in face of the huge infrastructure

The U.S. "is probably going to become our target construction market at the end of the year."

Andrew McNaughton, CEO, Balfour Beatty

deficits faced by such countries, coupled with their governments' policy initiative to deliver."

However, Subrahmanyam warns that many international contractors rushing to find geographic diversity have to be aware of widely different regulatory climates from nation to nation. There are "considerable regulatory risks of working in diverse geographies with relatively high entry barriers," he says.

McNaughton finds India to be "a fascinating market" in power and rail sectors. But tackling the Indian market is a "very long game." Other firms are also taking a long view on the market. "We are getting to learn about Indian culture in order to position ourselves on the right projects in a country where infrastructure needs are enormous," explains Rossi.

Latin America continues to attract growing inter-

Companies | By Yue Jiang

Chinese Contractors Thriving in the World Market

Chinese contractors have come a long way from just being labor suppliers. They are growing in sophistication and are becoming a presence in the international market.

Chinese construction companies as a group completed work worth \$116.6 billion in the overseas markets in 2012, an increase of 12.7% from 2011, according to a report by the China International Contractors Association (CHINCA), a Beijing-based industry alliance of Chinese companies that has foreign construction projects abroad. New contracts amounted to \$156.5 billion in 2012, up 10% from the year before.

The increases indicate a growing recovery of foreign markets for Chinese construction companies, which experienced only a 5.9% increase in backlog in 2011.

The recovery is mostly driven by the expansion of markets in African countries, which saw new contracts for Chinese contractors rise 39.9%, to \$64.05 billion, in 2012, according to the CHINCA report. The biggest increase within the African markets is from Nigeria, where new project awards amounted to \$10.2 billion.

In Asia, however, new contract awards fell 6.4% in 2012 due to lagging economic re-

covery in the region. For instance, new utility projects fell by \$10 billion in India due to the country's economic uncertainty.

The largest sector is transportation, which made up to 22.8% of the market. Transportation also took in the most new contracts, which were worth \$35.62 billion, an increase of 31.6% over last year.

Building construction, the second-largest market sector, secured 15.5% more new contracts, which are worth \$32.09 billion in 2012, mostly contributed by five residential building projects in Angola that total \$5.18 billion. ■

national interest, although the competition is tough. The region offers many opportunities across a range of sectors that are interesting to Bechtel, says Dawson. While one of Bechtel's largest engineering offices is in Chile, it is also optimistic about other countries, including Brazil, Colombia and Peru.

Vinci is particularly interested in developing businesses in Mexico, Colombia, Peru and Chile, where it is building a tunnel for "the world's largest underground copper mine," according to Rossi.

Bouygues entered the Brazilian market this year, winning a hotel contract in Rio de Janeiro with a local partner. Gabriel also expresses interest in Peru, Colombia, and Trinidad and Tobago. Balfour Beatty has

"a small team" in Brazil scouting out project management, investment and operations-and-maintenance opportunities, says McNaughton.

Once generally written off as an international construction market, Africa has risen in executives' expectations. "Growth has remained very robust," notes Rossi, citing among Vinci's wins pipelines in Benin, a port in Togo and a bridge in Cameroon.

Bechtel is "very bullish" about Africa, where governments increasingly are becoming more democratic and "want to invest in their people," says Dawson. "In 10 years, we will be talking about sub-Saharan Africa in the same way we talked about the Middle East 10 to 15 years ago," he believes. ■

SOURCE: ENR. NOTE: EXCLUDING \$176.4 MILLION FROM ANTARCTIC / ARCTIC OR UNALLOCATED

How To Read the Tables

Companies are ranked according to construction revenue generated outside of each company's home country in 2012 in U.S. \$ millions. Firms not ranked last year are designated **. Some markets may not add up to 100% due to omission of "other" miscellaneous market category and rounding. NA=Not available. †=Includes revenue of subsidiaries, the names of which are now available through ENR.com.

Figures include prime contracts, shares of joint ventures, subcontracts, design-construct contracts and construction

management-at-risk contracts when a firm's risks are similar to those of a general contractor's. Figures also include the value of installed equipment when a firm has prime responsibility for specifying and procuring it within a construction contract's scope.

General Building includes commercial buildings, offices, stores, educational facilities, government buildings, hospitals, medical facilities, hotels, apartments, housing, etc.

Manufacturing comprises auto, electronic assembly, textile plants, etc.

Power comprises thermal and hydroelectric powerplants, waste-to-energy plants, transmission lines, substations, cogeneration plants, etc.

Water Supply includes dams, reservoirs, transmission pipelines, distribution mains, irrigations canals, desalination and drinking-water treatment plants, pumping stations, etc.

Sewerage / Solid Waste includes sanitary and storm sewers, treatment plants, pumping plants, incinerators, industrial waste facilities, etc.

Industrial Process comprises pulp and paper mills, steel mills, non-ferrous metal

refineries, pharmaceutical plants, chemical plants, food and other processing plants, etc.

Petroleum includes refineries, petrochemical plants, offshore facilities, pipelines, etc.

Transportation includes airports, bridges, roads, canals, locks, dredging, marine facilities, piers, railroads, tunnels, etc.

Hazardous Waste includes chemical, nuclear-waste treatment, asbestos and lead abatement, etc.

Telecommunications comprises transmission lines, cabling, towers / antennae, data centers, etc.
